Professional Summary

Software Engineer with more than 5 years of experience building web, mobile, and health information systems. Experienced in Next.js, React Native, Python, and machine learning, with a focus on scalable and secure enterprise applications.

Technical Skills

Data Science & AI	Machine Learning (Python), Predictive Analytics, Data Fundamentals, R for Data Science
Languages	Python, JavaScript (ES6+), R, PHP, C# (.NET)
Web Technologies	HTML5, CSS3, Next.js, ReactJS, NodeJS, Django, Microsoft SharePoint
Mobile Development	React Native, Ionic React
Database Management	MySQL, Microsoft SQL Server, MongoDB
Tools & DevOps	Git, Jira, Jenkins, CI/CD pipelines
Operating Systems	Windows, Linux (Ubuntu/Debian)

Professional Experience

Software Developer — action medeor Medical Aid Organization

Jan 2025 – Present

- ✓ Develop frontend features for a Health Information System (HIS) using Next.js, helping improve healthcare workflows and user experience.
- ✓ Integrated a Mantra biometric fingerprint scanner into the HIS platform for secure patient and user identification.
- ✓ Built a React Native mobile stock count application that replaced manual paper-based inventory processes.
- ✓ Work with backend developers and healthcare teams to gather requirements, validate data, and support system reliability and compliance.

Software Developer — BEAN Medical Center

Nov 2023 – Aug 2024

- ✓ Led the end-to-end design and development of a custom Clinic Management System using React and MySQL, facilitating seamless tracking of patient records, schedules, and clinical histories.
- ✓ Boosted clinic operational efficiency by 15% through the automation of routine workflows and the creation of built-in performance metric reporting features.
- ✓ Implemented secure role-based access control (RBAC) and data encryption mechanisms to safeguard sensitive medical records and guarantee regulatory compliance.
- ✓ Executed rigorous unit and integration testing phases, optimizing the platform for high-concurrency usage among medical professionals.

Mobile App Developer (Part-Time / Remote) — Yakumudzi Investments

Aug 2023 – Nov 2023

- ✓ Designed and engineered cross-platform mobile applications for iOS and Android environments using React Native.
- ✓ Partnered with UI/UX designers to translate wireframes into pixel-perfect, high-performance mobile interfaces.
- ✓ Built, optimized, and integrated external RESTful APIs to deliver dynamic data streams and features to the end-user.

Assistant Junior Software Developer — Malawi Liverpool Wellcome Trust

Jan 2021 – July 2023

- ✓ Translated abstract project requirements into actionable technical logic by designing algorithms, data flowcharts, and system schematics.
- ✓ Developed custom internal portal pages and workflows using Microsoft SharePoint to enhance cross-departmental collaboration.
- ✓ Authored clean, maintainable code based on rigid specifications; continuously troubleshooted, debugged, and upgraded legacy systems to minimize downtime.

Education

Bachelor of Engineering in Electronics and Computer Engineering (Honours)

Graduated: 2022

Malawi University of Business and Applied Sciences (MUBAS)

Professional Certifications & Credentials

[View on Credly](#)

- ✓ Machine Learning with Python - Level 1 — IBM
- ✓ Python for Data Science — IBM
- ✓ R for Data Science — IBM
- ✓ Data Fundamentals — IBM SkillsBuild
- ✓ AI Fundamentals: Foundations for Understanding AI — IBM SkillsBuild
- ✓ Certificate in React — Great Learning Academy
- ✓ Certificate in MySQL — Great Learning Academy
